

1.

There are less than four hundred Sumatran tigers, so we must protect their habitat and stop hunting them.

Leatherback sea turtles are in danger of extinction because people destroy their habitat and collect their eggs.

There are no elephant birds left on Earth today because people hunted them for their meat and eggs.

The black mamba is a poisonous reptile. It lives in the forests of Africa and hunts small animals.

According to the information above, who is talking about an extinct animal?

- A) Peter B) George
C) Henry D) Steve

2. Read the information about kangaroos and complete the blank.

Kangaroos

- A) are large carnivores
B) live both in water and on land
C) are less than fifty kilograms
D) live for more than twenty years

3.

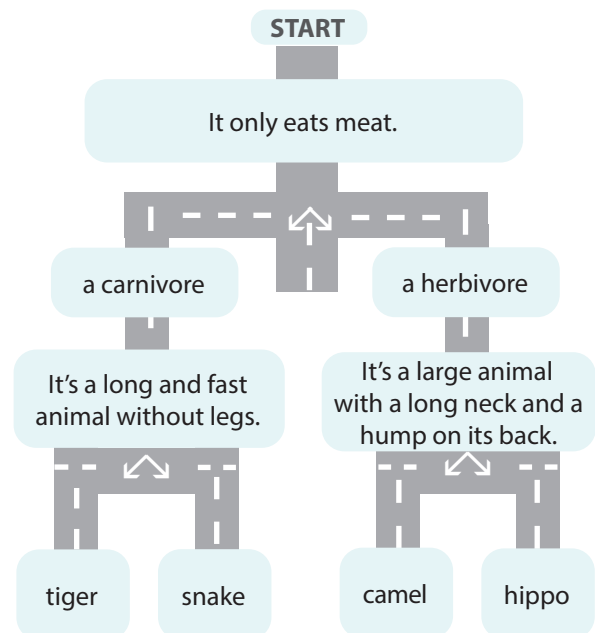

The Mediterranean Monk Seals are one of the most enormous animals in the world. They weigh about 400 kg and measure about 2.4 m. They are carnivores and they eat fish and octopus. They generally live in silent sea caves. These pretty animals are becoming extinct because of overhunting. Fishermen destroy their caves and kill them for their meat and oil.

There's **NO** information in the text about Mediterranean Monk Seals'

- A) lifespan B) size
C) prey D) habitat

4. George is playing a game. He should choose the correct moves to learn about Peter's favorite animal.

Which of the following is Peter's favourite animal?

- A) tiger B) snake
C) camel D) hippo

5. Read the information, look at the visuals and answer the question.

Mr. Jones told his students about the characteristics and habitats of some wild animals in his science class this morning. Then, he wanted his students to describe the animals below.

Which of the following descriptions does NOT belong to any of the animals above?

- A) It is a reptile with strong jaws, sharp teeth and short legs. It lives both in water and on land. It usually lives in marshes and feeds on mammals, birds and reptiles.
- B) It's a large carnivore with a short tail, strong claws, large paws and thick fur. It feeds on seals and fish. It lives in very cold climate and spends most of its life on the sea ice of the Arctic Ocean.
- C) It's a wild animal with a long tail, strong claws, sharp teeth and dark stripes on its fur. It lives in the jungle and hunts at night. Its prey is various species of deer and bear.
- D) It's an enormous mammal with tusks, large ears and a long trunk. It's larger than any other land mammals. It's a herbivore and it eats grass and leaves.

6. Read the text about Giant Pandas and answer the question.

Giant Pandas live in the mountains of Central China. They are pretty animals with a big head, heavy body, rounded ears and a short tail. They are about 140 kg. and 1.5 m. tall. Their main food is bamboo. People cut down bamboo trees for more farmland and kill these cute animals for their fur, so they are becoming extinct.

Which of the following questions does NOT have an answer in the text above?

- A) How long do they live?
- B) What do they eat?
- C) How much do they weigh?
- D) Why are they endangered?

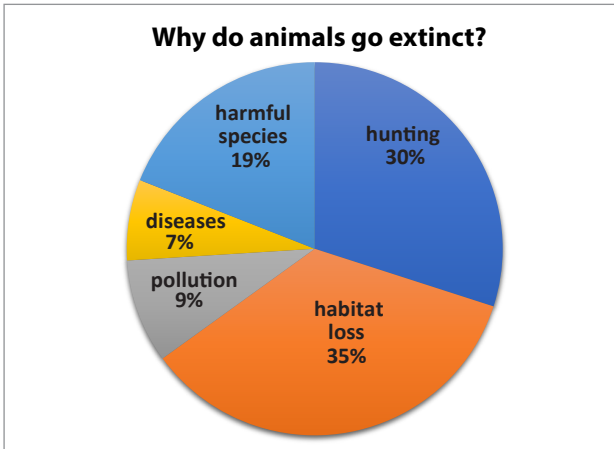

7. What's the correct order of the answers?

- a. Do they give birth to their babies?
- b. Do they eat plants?
- c. Do they weigh more than a few tons?
- d. Do they live in the oceans?

- 1. Yes, they are herbivores.
- 2. No, they lay eggs.
- 3. No, their habitat is the jungle.
- 4. Yes, they are so heavy.

- A) 2-4-1-3
- B) 3-1-4-2
- C) 2- 1-4-3
- D) 3-4-1-2

8. Peter attends Animal Lovers' Club this year after school. Last week, he did some research about the reasons why animals become extinct. Here are the results of his study:

Which of the following is correct according to the graph above?

- A) The most important cause of animal extinction is diseases.
 B) Hunting is the only reason for the extinction of the animal species.
 C) Habitat loss has fewer negative effects on animals than harmful species.
 D) Diseases give less harm to animal species than pollution.

9.

WHAT SHOULD WE DO TO SAVE WILDLIFE?

Don't hunt wild animals for their skin!	Educate people about wildlife!
Don't wear fur!

- I. Stop polluting water and air!
 II. Don't destroy forests!
 III. Stop protecting their habitats!
 IV. Plant more trees!

Which of the following does NOT complete the table above?

- A) I
 B) II
 C) III
 D) IV

10. Read the texts and answer the question.

Dodos lived on an island in the Indian Ocean. They were large birds with small wings and short legs. These cute birds were about 1 m. tall and they weighed about 20 kg. They were herbivores. People hunted them for their meat and destroyed their habitat. The last dodo bird died in 1681.

Mammoths were enormous animals with long tusks and a trunk. They weighed about 6 tons and measured about 5 m. Their habitats were the forests and grasslands in northern Asia and Europe. They ate plants such as grass and leaves. Humans killed them for their skin and meat. The last mammoths died 3700 years ago.

Which of the following is NOT correct according to the texts above?

- A) The mammoth was a lot heavier and taller than the dodo.
 B) Mammoths and dodos lived on land and fed on meat.
 C) Both dodos and mammoths became extinct so many years ago.
 D) Mammoths and dodos had different physical characteristics.
