Read the text below and answer the questions 3-4.

Giant Pandas live in the mountains of Central China. They spend their lives eating bamboo, a tall tropical grass, and walking around the forest. They are good climbers and good swimmers. They prefer to live on their own. An adult panda spends around 14 hours eating every day because bamboo is not very nutritious. Giant pandas grow to between 1,2m and 1,5m, and weigh between 75 kg and 135 kg. Scientists aren't sure how long pandas live in the wild, but in a cage, they live about 30 years. Sadly, giant pandas are endangered, and scientists believe there are only around 1,000 pandas left in the wild. That's why we need to do all we can to protect them!
