3. Put the sentences into correct places of conversation. (5 points each.)

A- The world is getting warmer and warmer. Don't harm us. Be a protector.

B- Also, you can join the environment clubs and make some campaigns.

C- The polar glaciers melt and endangered polar bears can't find enough food.

D- This word means cutting lots of trees in a short time.

E- If we don't do something now, it will be too late.

Leon: Hey, Matilda. You look so upset. What is the matter with you?

Matilda: Hi, Leon. That is correct. I feel bad because of the problems damaging the earth.

Leon: What do you mean by that? Can you explain it more?

Matilda: Sure. The first one is climate change. As we both observe for last two years, the winters are little bit hotter and the summers are colder than in the past. This destroys the balance of nature, the animals die and the trees don't give enough fruits. Also, global warming makes it worse, and unfortunately we are responsible for this destruction.

Leon: Oh my God! That is terrible. Please, tell me more.

Matilda: Of course. According to a research, clean water sources are decreasing day by day because of the pollution. People throw their garbage into the seas, factories pollute the rivers and some of the fishermen don't pay attention to the creatures in the water. As you know, nothing can survive without water. 1- _____.

Leon: That is right. What else?

Matilda: Air pollution. The first reason of it is using the energy sources that are harmful to nature. I mean we need to prefer alternative and renewable energy sources like wind energy or solar energy to fossil fuels immediately. If we take action and start using useful ways for heating or lighting at homes too, this action will absolutely make a positive impact on environment.

Leon: I agree with you. What do you think about deforestation?

Matilda: It is the most terrible thing that people do to nature. 2- _____. When we do that, lots of animals lose their habitat, some of endangered animals become extinct, the amount of oxygen in the forests decreases and the toxic gases(fumes) in the air increase.

Leon: Let me ask you an important question. What can I do to protect the environment at home?

Matilda: Lots of things. You can save energy by turning/switching the unnecessary electronic devices off, take shorter showers, plant a tree in your garden, recycle and sort out the things and use rechargeable batteries. 3- _____.

Leon: Really! Are you a member of an environment club?

Matilda: Sure. We always focus on different problems. This week, we discuss the destructive effects of global warming.

Leon: Hmmm. I know them. 4- _____.

Matilda: Exactly. Let's make you an environmentalist with a slogan. Now, I want you to tell me a great slogan about global warming for our campaign.

Leon: Hmmm. Let me think. Ok. I found it. " 5- _____.
