It lives in Australia. It can jump high and it can carry its baby in its pocket.	K ANGAROO

5. Read the text and write TRUE or FALSE . (20P)

The Mediterranean Monk Seals

They weigh about 400 kg and measure about 2.4 m. They can live for 20-30 years. They are carnivores and eat fish and octopus. Their habitats are generally silent sea caves. I'm really sorry about these cute seals because they are becoming extinct. Fishers kill them and give harm to their caves. We should protect them and their habitats.

1. Monk Seals eat meat. ____ **TRUE** ____
2. They live in the forest. ____ **FALSE** ____
3. People should protect them because they are endangered. ____ **TRUE** ____
4. Their height is about 400 kg. ____ **FALSE** ____

GOOD LUCK 😊
